

DLIP Final Project Introduction

Department of Mechanical and Control Engineering

Presenting: Kwak, Jin & Choi, Yoonseok

1. Project Introduction

Project Name: Unmanned Ground Sensor System

Objective

- 1) Replace manpower for alert duty(哨兵) in military using mono-camera.

Problem Statement

- 1) Military power loss due to low birth rate → Guard duty burden
- 2) Reduced combat power due to non-combat missions
- 3) Should be economically efficient and

Real-time response(即刻 對應) to incidents

2. Anticipated Effect
